KEEP WALES NUCLEAR-FREE!

Once again the government is promoting nuclear power as a quick-fix solution to the energy crisis, yet for 50 years the nuclear industry, at huge cost to the taxpayer, has been polluting the environment, bequeathing a precarious legacy of hazardous waste and financial burden to future generations. **Nuclear power is unsafe, uneconomic and utterly unnecessary. The government MUST invest in safer, cleaner, cheaper alternatives.**

Please let Tony Blair know you oppose the commissioning of any new nuclear power stations in Wales by signing the petition below. YOUR SIGNATURE COULD MAKE A DIFFERENCE! Please photocopy and distribute freely – you don't have to live in Wales to sign. (Your details won't be used for any other purpose.)

"We, the undersigned, strongly oppose the commissioning of any nuclear power stations in Wales and demand safer, cleaner, cheaper technology:"

NAME	ADDRESS	SIGNATURE	EMAIL (if you'd like to be kept up to date)

Please return completed petitions by 31 March 2006 to:
Pembrokeshire Friends of the Earth, Span Arts, Town Moor, Narberth, SA67 7AG
