

Protect our food from GM contamination

Friends of the Earth

Dear _____ MP

I am concerned that Government 'coexistence' proposals will allow GM crops to be grown next to organic and conventional crops without adequate controls. If agreed, unlabelled GM contamination will become routine and liability for damage will be weak. Leading European lawyers have found these proposals "fundamentally flawed" and inconsistent with EU law.

Please write to the Environment Secretary. Ask how he will ensure that 'coexistence' regulations comply with EU law. Urge him to protect our right to choose GM-free food, to safeguard our health and the environment, and to ensure GM companies are strictly liable for damage caused by their products.

I look forward to hearing from you.

Yours sincerely,
